Release Plan

Housemates, Dev Team, Housemates Release #1, 4/19/2022

-1.0.0 - 4/5/2022-

High Level Goals - Release #1
- The user should be able to create a user-profile and login to the application, with the limitations that the user data will be stored locally and not in a shared database.

User Stories - Release #1
- **User story 1: (6 points)** "As a *housemate, I want to be able to create and access my own profile to identify myself with other people*"

Product Backlog - Release #1
- **Backlog item 1: (6 points)** "As a *housemate*, I want *to be able to signup and login to my Housemates application across accounts and sessions*, so that *I can securely and persistently access my housemates information*"

Housemates, team-name, Housemates Release #2, 5/3/2022

-1.0.0 - 4/5/2022-

High Level Goals - Release #2
- The user should be able to signup and login across accounts and sessions such that their information is persistently stored in a backend database.
- The user should be able to easily navigate through the application and intuitively access all pages with ease.
- The user should be able to edit their profile and settings to update their password, email, name, phone number, and app settings. Limitations: The profile updates would be local to one session and not stored in a database.
- The user should be able to view and add house rules to their housegroup. These changes should be persistent across multiple accounts and sessions.
- The user should be able to view and add chores to their housegroup. These changes should be persistent across multiple accounts and sessions.
- The user should be able to view all the members in their housegroup. These changes should be persistent across multiple accounts and sessions.

User Stories - Release #2

- **User story 2: (6 points)** "As a *housemate*, I want *to be able to signup and login to my Housemates application across accounts and sessions*, so that *I can securely and persistently access my housemates information*"
- **User story 3: (4 points)** "As a *housemate*, I want *to be able to easily navigate through the application*, so that *I can easily access all the information in my application*"
- **User story 4: (4 points)** "As a *housemate, I want to be able to view my profile and app settings so that I can see things such as my password, email, notifications…*"
- **User story 5: (14 points)** "As a *housemate*, I want *to be able to view and add houserules to my house group*, so that *all housemates can have better understanding of the expectations around our living spaces*"
- **User story 6: (14 points)** "As a *housemate*, I want *to be able to view and add chores to my house group*, so that *all housemates can coordinate and work together around the house*"
- **User story 7: (10 points)** "As a *housemate*, I want *to be able to view members in my house group*, so that *I can acknowledge and contact my housemates*"

Product Backlog - Release #2

- **Backlog item 1: (10 points)** "As a *housemate*, I want *to persistently view and edit my profile*, so that I *can access and modify my information across accounts and sessions*"
- **Backlog item 2: (8 points)** "As a *housemate*, I want *to be able create, join, and leave a house group*, so that I manage a homegroup, be part of a house group, and leave a house group when I want*"

Housemates, team-name, Housemates Release #3, 5/17/2022

-1.0.0 - 4/5/2022-

High Level Goals - Release #3

- The user should be able to create, assign and finish chores. These changes from the app should also reflect in the backend.
- The user should be able to view what chores they are assigned to in the app.
- The user should be able to persistently login and signup to the application such that user data is stored in the database.
- The user should be able to upload a profile picture and be saved on the server. They, as well as their housemates, should also be able to see their profile picture once they upload it.
- The user should be able to join and leave a house group. This would be done by a randomly generated housecode.
- The user should be able to interact with a calendar and see their own and housemates' schedules

User Stories - Release #3

- **User story 8: (12 points)** "As a *housemate*, I want *to be able to assign, unassign, and edit a chore*, so that *I can edit chores and track what chores I must complete*"
- **User story 9: (6 points)** "As a *housemate*, I want *to be able to delete chores*, so that *we can clear chores that have already been completed*"
- **User story 10 (6 points)** ("As a *housemate*, I want *to persistently signup and login to my application*, so that *my information can be saved across multiple sessions*")
- **User story 11: (6 points)** "As a *housemate*, I want *to be able to persistently edit house rules*, so that *we can change house rules across many user sessions*"
- **User story 12: (8 points)** "As a *housemate*, I want *to be able create, join, and leave a house group*, so that I manage a homegroup, be part of a house group, and leave a house group when I want*"
- **User story 13: (10 points)** "As a *housemate*, I want *to persistently edit my profile*, so that I *can change my personal information across accounts and sessions*"
- **User story 14: (4 points)** "As a *housemate*, I want *to persistently view and interact with the home page*, so that I *can view the chores and house rules across accounts and sessions*"
- **User story 15: (12 points)** "As a *housemate*, I want *to share and see my housemates' schedules*, so that I *can coordinate with my housemates based on their availability.*"

Product Backlog - Release #3

- **Backlog item 1:** "As a *housemate*, I want *to be able to see the house rules that have been approved and haven't been approved*, so that *I can see which house rules the majority of my housemates*"
- **Backlog item 2:** "As a *housemate*, I want *to share and see my housemates' schedules across accounts and sessions*, so that I *can coordinate with my housemates based on their availability.*"
